EDUCATION

University of Waterloo

Bachelor of Mathematics, Honours Mathematics - Wrestling Team, Velocity, Startup Projects

Waterloo, ON

Present

TECHNICAL SKILLS

Languages/Frameworks: Python, TypeScript, JavaScript, SQL, Ruby, React, Node.js, Arduino

AI Tools: Cursor, GitHub Copilot, Claude

Cloud & Security: AWS, Azure, IAM, SIEM, ISO 27001, SOC 2

Tools: Git, GitHub, Docker, Pandas, NumPy, scikit-learn

Certifications: AWS Cloud Practitioner, Cisco CCST (Cybersecurity), Microsoft AZ-900, IT Specialist – Python

EXPERIENCE

Software Engineering & Systems Design Intern

2025

Islamic Books & Souvenirs

Toronto, ON

- Saved 20+ hrs/month by automating product catalog sync between Shopify and Clover using Python and Pandas.
- Optimized page load by 35% via custom Shopify theme built with Liquid, JavaScript, and CSS.
- Reduced support response time by 40% through real-time WhatsApp API integration using JavaScript and webhooks.

Software Engineering & Cybersecurity Intern

2024 – 2025

The Blackstone Foundation Library

Toronto, ON

- Cut application review time by 60% by developing admin registration & approval system in Python.
- Reduced unauthorized access attempts by 80% by implementing least-privilege IAM policies with RBAC.
- Resolved 30+ security incidents through forensic analysis using Python and EDR tools; authored incident playbooks.

Cybersecurity Engineer

2020 – 2023

Canadian Cyber Inc.

Mississauga, ON

- Mitigated 150+ vulnerabilities and cut incident response time by 25% via SIEM log monitoring and automation.
- Strengthened compliance on 70+ endpoints by deploying BitLocker and Windows Information Protection (WIP).
- Reviewed and updated ISO 27001 & SOC 2 policies to support client certification audits.

PROJECTS & EXTRACURRICULARS

GooseType (formerly WaterlooType)

- Built a competitive typing platform initially exclusive to Waterloo; pivoted after server ban, scaling to all uni's
- Implemented real-time leaderboards, approval flows, optimized UI/UX using React, Next.js, Supabase, and Vercel.
- Designed a scalable database architecture now supporting 100+ active users.

Scrollify - Gamified Consequential Scrolling (GoOnHacks Winner)

- Developed a full-stack app that gamified distraction: 1 minute of scrolling = 1 leaderboard point.
- Built browser extension tracking productivity and triggering real-time notifications.
- If user stayed productive for 5+ minutes, system triggered an automated call to the parent number linked at signup.
- **Tech:** Supabase, Expo Go, React Native, Swift, TypeScript, Twilio, Deepgram.

Triageo – AI Incident Remediation (Hack The North)

- Built Slack-native AI assistant that triages security logs in `js`, assigning severity, category, and remediation guidance.
- Integrated a custom RAG engine grounded in OWASP Top 10 and internal playbooks for explainable triage.
- Enabled escalation, acknowledgement, and downgrades directly through Slack UI to reduce context switching.

COMPETITIONS & AWARDS

Hack the North – Cybersecurity Projects, GoOnHacks Winner

2025

DMZ CanHack, PicoCTF (8th National), LyonCTF (4th National)

2022 – 2023
