EDUCATION

University of Waterloo

Bachelor of Mathematics, Honours Mathematics

Waterloo, ON

2025 – 2029

TECHNICAL SKILLS

Languages/Frameworks: Python, Ruby, SQL, JavaScript, React, Node

Tools: Git, GitHub, Docker, Pandas, NumPy, scikit-learn

Cloud & Security: AWS, Azure, IAM, SIEM, ISO 27001, SOC 2

Certifications: AWS Cloud Practitioner, Cisco CCST – Cybersecurity, Microsoft AZ-900, IT Specialist – Python

EXPERIENCE

Software Engineering & Systems Design Intern

Dec 2024 – Jun 2025

Islamic Books & Souvenirs

Toronto, ON

- Saved 20+ hrs/month by automating product catalog sync between Shopify and Clover using Python and Pandas.
- Optimized page load by 35% via custom Shopify theme built with Liquid, JavaScript, and CSS.
- Reduced support response time by 40% through real-time WhatsApp API integration using JavaScript and webhooks.

Software Engineering & Cybersecurity Intern

Feb 2024 – Jun 2024

The Blackstone Foundation Library

Toronto, ON

- Cut application review time by 60% by developing admin registration & approval system in Python.
- Reduced unauthorized access attempts by 80% by implementing least-privilege IAM policies with RBAC.
- Resolved 30+ security incidents through forensic analysis using Python and EDR tools; authored incident playbooks.

Cybersecurity Engineer

Jan 2020 – Oct 2023

Canadian Cyber Inc.

Mississauga, ON

- Mitigated 150+ vulnerabilities and cut incident response time by 25% via SIEM log monitoring and automation.
- Strengthened compliance on 70+ endpoints by deploying BitLocker and Windows Information Protection (WIP).
- Reviewed and updated ISO 27001 & SOC 2 policies to support client certification audits.

PROJECTS & EXTRACURRICULARS

Triageo – AI Incident Remediation (Hack The North) | *Python, Slack API, RAG, OWASP*

- Built a Slack-native AI assistant that triages security logs in less than 5s, assigning severity, category, and remediation steps.
- Integrated a lightweight RAG engine grounded in OWASP Top 10 and internal runbooks for explainable triage.
- Enabled analysts to escalate, acknowledge, or downgrade alerts via Slack UI, reducing context switching.

Malicious Payload USB Project | *Raspberry Pi, HID, USB Emulation*

- Developed a USB-based payload emulator using Raspberry Pi to mimic HID attacks and demonstrate access risk.
- Created modular scripts for keystroke injection, file exfiltration, and reverse shell execution.
- Delivered demo framework and documentation for internal red-team and awareness training.

AI Mental Health Voice Agent | *Python, Twilio, Deepgram, Conversational AI*

- Built conversational, voice-based agent for empathetic mental health support that verbalizes coping skills.
- Implemented safe escalation: detects crisis/self-harm signals and transfers to human services when needed.
- Ensured privacy compliance by anonymizing data and logging minimal metadata for quality improvement.

COMPETITIONS & AWARDS

Hack the North – Cybersecurity Projects

2025

DMZ CanHack, PicoCTF (8th National), LyonCTF (4th National)

2022 – 2023
